IT'S YOUR SECURITY

## Grasshoppers Jump 20 Times the Length of their Bodies

The average grasshopper can jump about 20 times as far as the length of its body and they don't even know they are making such an extraordinary effort. They do this by combining the strength of their legs with the use of their small wings. And unlike most extreme efforts, the grasshopper performs this as part of its daily routine.

### *We Would Like to Jump For You*

We have been trained and are prepared to make extraordinary efforts to help you accomplish your security objectives. We have combined our individual talents to make it possible to achieve amazing results. In fact, our staff performs extraordinarily every day—as part of their normal routine. If you have a loss prevention need that requires an extraordinary effort, please feel free to call us, and ask us to jump.
