

DO IT YOURSELF TIP

### Are You Afraid of Spiders? A Key Spider May Be Your Best Friend

When you check your car at a car wash or leave it with valet parking, your home, office and car become vulnerable to theft and or burglary.

Most standard keys can be easily duplicated in seconds. Even if no key machine is available, the key cuts can be read by a trained eye, recorded and code-cut at a later time.

The easiest way to protect yourself is with a key spider. Each key can be isolated and loaned individually if necessary.

SECURITY TRENDS

## Now You Can Use Video Technology To Answer & Open Your Door

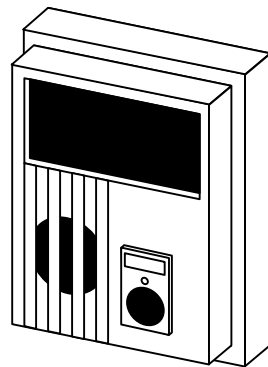

When you are busy and someone knocks at your door, a video answering system allows you to see who is there, allows you to talk to the visitor and if you choose, even open the door remotely.

also include a ~~Home~~ Release which operates an electric lock or jamb strike, allowing you to open the door from the location of the video receiver.

### Home & Office Safety and Security

#### It's a Simple CCTV System

Utilizing the latest in closed circuit television (CCTV) technology, this new breed of low cost video answering systems gives you complete remote control of your doors.

New video access systems allow you to monitor your entrances, communicate with visitors and open doors remotely.

#### Privacy & Convenience

These systems include a Monitor button which provides privacy by allowing you to observe the visitor completely undetected. These systems

These new video systems are less expensive than ever and are an ideal addition to the service entrance of a small business or can even be used on the remote gate or back door of a home.

If you don't like being bothered by door-to-door peddlers or if you don't want your employees to open your service entrance

for unknown visitors, these systems provide both security and convenience.
